MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview of Logistics Industry

The growth of the global logistics market is directly related to the development of international trade flow and the current economic environment. Asia Pacific and North America appear to be the most attractive markets for logistics, particularly when it comes to contract service such as third-party logistics. The global logistics market to grow at a CAGR of 6.54% during the period 2017-2021.

In the wake of globalization, the importance of logistics is increasing as more and more, both national and multi-national companies are sourcing, manufacturing and distributing their products and services on a global scale. Thus, the recognition of performance of logistics industry would become prime importance of economic development for India in long term. Favourable government trade policies have resulted in an increased demand for logistics services to keep pace with the increased logistics needs of importers and exporters which provides opportunity for expansion to the existing vendors.

Indian Logistic Industry

The Indian logistics industry is estimated to be worth around US\$ 160 billion in 2016-17 and has grown at a compound annual growth rate (CAGR) of 7.8 per cent over the past five years. Considering the impact of implementation of the Goods and Services Tax (GST), the Indian logistics market is expected to reach about US\$ 215 billion in 2019-20, growing at a CAGR of 10.5%. Improved logistics have huge implications on increasing exports, as a 10% decrease in indirect logistics cost can contribute to around 5-8% of extra exports. India has improved its ranking in the "Logistics Performance Index" (LPI) from 54 in 2014 to 35 in 2016.

Our Business Overview

We are an organized third-party logistics service operator offering logistics solutions to a wide range of customers. We offer Full Truck Load (FTL) and "hub-and-spoke" transportation model and warehousing services to select clients with pan-India distribution network and automated technology systems. Our customers operate in various sectors across India, including automotive and heavy

engineering, telecom, food and agro, fast-moving consumer goods ("FMCG"), paint and dairy. We believe our business model enables us to act as a service provider that can comprehensively cover our customers' logistics requirements. We provide solutions that enable our customers to leverage our distribution network which optimizes the performance, cost and efficiency of their supply chains, shortening their lead-time to market resulting in lower inventory costs to the customer.

We offer our customers services in three key areas (1) Transportation whereby we provide point-to-point, less-than truck-load, time-definite transportation services; (2) Warehousing whereby we provide warehousing, distribution and cold-chain warehousing; and (3) Value-added Services including, temperature-controlled logistics, supply chain solutions and cargo handling services at integrated check posts.

Risk and Concerns

Competition and Pricing

In the regions of India in which we operate, we face competition from certain regional logistics services providers and the unorganized sector, some of which have market presence in their respective areas of operation. We may also face competition from new entrants into the logistics service industry.

Dependency on trucks, machinery and equipment for business operations.

Our third-party logistics offerings are heavily dependent on trucks, machinery and equipment, including air conditioners, refrigeration infrastructure, data loggers, sorters and conveyors, vehicles and material handling equipment, including reefer trucks, forklifts, very narrow aisle trucks and battery-operated pallet trucks. And any failure or breakdown of such trucks or equipment could significantly affect our operations in that business. Any significant malfunction or breakdown of our machinery or equipment may entail significant repair and maintenance costs and cause delays in our operations.

Dependency on technology and automation

We use technology and automation processes throughout our logistics offerings to enable efficient and cost effective operational management to better serve our customers' supply chain needs. Some of our recent technology and automation implementation may not result in the expected efficiencies and benefits we anticipate, which could adversely affect our operations and financial condition. Further, technology is susceptible to outages and technical vulnerabilities, which may result in us incurring additional expenses from time to time.

Other Risk Factors

We have also listed out numerous risk factors in our Red Herring Prospectus issued in March, 2018 during our IPO, many of these risks continue and we are constantly evaluating our options to address these in order to remain competitive.

Our Strengths

1. We are an integrated service provider with an extensive network of branches in a fast-growing third-party logistics market.

We are an integrated service provider with five (5) trans-shipment centres for LTL (less than truck load) at Guwahati, Bangalore, Hyderabad, Delhi-UP border, and Kundli (Delhi-Haryana border), forty nine (49) branches spread across India covering 23 states in India. The locations of branches and delivery network enables us to provide our customers with access to multiple destinations for booking and delivery of goods across India. We also provide our customers a mix of transportation services i.e. both road and rail, through the Container Corporation of India (CCI) and Indian Railways for express delivery of their shipments.

2. Extensive owned fleet of vehicles

We have a low carbon emitting young fleet of Tata Motors, Ashok Leyland and Eicher trucks equipped with a wide range of cargo loads beginning from 1 Ton, used for pick-up and delivery and 9 Ton to 20 Ton used for long haul transportation. The ratio of owned to third party vehicles used in operations is about 1:2 in the FY 2018. Presently, we own three hundred forty (340) containerized GPS-enabled vehicles of which one hundred ten (110) are

refrigerated (reefer) trucks.

3. Comprehensive solution for transportation requirements.

We provide comprehensive third-party logistics services through transportation, warehousing and temperature-controlled logistics at competitive rates. We provide end-to-end customised logistics, warehousing and supply chain solutions for certain select customers. Our ability to manage most of the supply chain requirements of our customers enables our customers to reduce the number of service providers they engage. Our logistics offerings also present us with cross-selling opportunities for providing warehousing facilities to the customers and other value added services.

4. Diverse customer base across many sectors.

Our customer base spans many sectors, including retail, pharmaceutical, telecom, automotive and heavy engineering, food and agro, FMCG, paint and dairy. We have a diversified customer base in each of the sectors we serve, including Indian corporate groups and multinational companies. We believe we are well positioned in the logistics industry in India, given our experience and infrastructure suited to serve a wide range of sectors. Over the years, we have built strong customer relations, demonstrating the value proposition we provide and positioning us for expected further growth.

5. We have adopted latest technology and automation.

We have adopted technology and automated processes for meeting client-specific needs. We have adopted various technologies and automation in our business, including (i) our Transport Management System ("TMS"), which provides shipment-level visibility from pick-up, to delivery, to billing as well as routing solutions, and is also linked to our enterprise resource planning system, (ii) our Vehicle Tracking System ("VTS"), which enables our customers to track their goods online and in real-time while in transit; (iii) remote access to our delivery vehicles and (iv) a real-time data logging system that enables us to monitor temperature variations in our distribution centres and our reefer trucks used in our temperature-controlled logistics services.

6. Experienced management team.

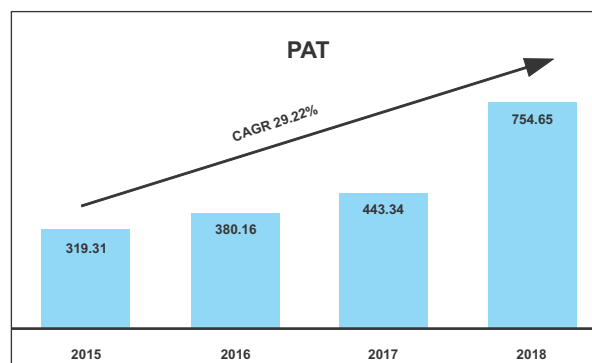

We have a management team with vast experience in the logistics industry. The quality of our management team has been critical in achieving our business results. All members of our senior management team have substantial experience. Our management team is responsible for formulating our strategy, managing our

service areas, diversifying our business and sector mix, ensuring strong operating and technology platforms and expanding our customer relationships. Further, our management team enables us to conceptualise and develop new services, effectively markets our services, and develop and maintain relationships with our customers and vendors.

Revenue

In the financial year 2017-18, the company achieved significant increase of 15.35 % in revenues over last year revenues. In financial year 2016-17, the increase was only 1.33%.

The significant increase in revenues in FY 2017-18 was driven mainly by volume growth and price mix realization and addition of some valuable customers.

Costs

We recognize that our future success hinges on our ability to manage our cost structure and optimize the cost of doing business. With this , we improved our EBITDA margin to the level of 10.72% of total revenue from 8.61% in the last FY 2016-17.

Our major cost items include diesel cost for trucks operations, freight expenses, staff cost and infrastructure costs. All these costs have been largely maintained and marginally reduced to expected levels. The same is reflecting in improvement of EBITDA margin. We are continuing our efforts to keep our costs in check and ensure that we manage our business efficiently.

PBT and PAT

Consequent to the above growth in EBITDA, we improved our PBT to the level of 5.35% of total revenue from 3.29 % in the last FY 2016-17. And improved our PAT to the level of 3.36% of total revenue from 2.31% in the last FY 2016-17.

Thus , our diluted EPS improved significantly to Rs.10.47 from Rs.6.25 per equity share of Rs.10 each reflecting an improvement of 67.52%.

Cash and Bank

Our cash and cash equivalents increased to Rs.146.30 lacs at the end of FY 2017-18 from Rs. 69.80 lacs at the end of last FY 2016-17 . This was driven by operating cash inflow of Rs. 1370.73 lacs post taxes and working capital changes. Capital expenditure consumed Rs. 1255.73 lacs as against Rs. 921.74 lacs in the last FY 2016-17

Strategy for Growth

Our growth strategy continues to be based on the following :-

- Continue to expand our presence in the market to cater logistics services

- Continue to expand our infrastructure and branches network in various parts of India to provide door step logistics services to our customers
- Continue to expand our own fleet of transport vehicles of various descriptions including refrigerated transport vehicles suitable for cold chain supplies and distribution network. The expansion of own fleet of transport vehicles is fully correlated with the long term contracts with the customers with assured business.
- Continue to expand our capabilities to provide comprehensive logistics solutions to all our customers and thus offering single window logistics solutions to the industry at large requiring logistics services.
- Continue to expand and up gradation of technology used in our industry.
- Development of own warehouse spaces , logistics parks and other storage facilities
- Our focus will continue to drive revenue growth through volumes and service mix. Thus , our business model will continue to focus on productive improvement to the satisfaction of all our customers to have competitive pricing and use of latest technology to build strong base.

HUMAN RESOURCES

We are one of the leading companies providing logistics services in India. Transportation , warehousing and logistics industry is service delivery industry and thus the role of human resources is vital in providing quality services to the customers.

The company business has been constantly growing since the start of it's business in the year 2010. Accordingly, the human resources has to be commensurate with the size and growth of the business. Annexure B referred to the Independent Auditor's Report to the Members of AVG LOGISTICS LIMITED being report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **AVG LOGISTICS LIMITED** ("the Company") as of March 31, 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal controls stated in the Guidance Note on Audit of Internal Financial controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting bases on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial controls over Financial Reporting (the "Guidance Note") and the standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls systems over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting, assessing the risk that evaluating the design, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of

material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial controls over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

1. Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and disposition of the assets of the company.
2. Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditure of the company are being made only in accordance with authorizations of management and directors of the company.
3. Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting

criteria established by the Company considering the essential components of internal controls stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

(the company, CIN: L60200DL2010PLC198327) (formally known as AVG Logistics Private Limited) was incorporated on 25th January, 2010 under the Companies Act, 1956. The main object of the company is of transportation of goods and warehousing and other incidental activities there to. The registered office the company is situated in the state of New Delhi. As on the date of Balance Sheet, company's equity share were in the process of getting listed on NSE- SME Platform. Further on 11.04.2018, the equity shares of Company got listed on Stock Exchanges. The financial statements for the year ended March 31, 2018 were approved by the Board of Directors on May 30, 2018.

1. Significant Accounting Policies**• Basis of Accounting & Revenue Recognition**

These financial statements have been prepared under the historical cost convention on a going concern basis, on the accrual basis of accounting. The financial statements have been prepared in accordance with the Generally Accepted Accounting Principles (GAAP) in India. Indian GAAP comprises mandatory accounting standards as specified under the section 133 of the Companies Act, 2013 read with Rule 7 of Companies (Accounts) Rules, 2014 and other accounting pronouncements of the Institute of Chartered Accountants of India. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

• Use of estimates

The preparation of financial statements requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expense during the year.

• Revenue Recognition

- ✓ Revenues / Incomes and Cost / Expenditures are generally accounted on accrual basis, as and when they are earned or incurred.
- ✓ Revenues from sale of services are recognized on completion of related services, and are exclusive of service tax / GST as applicable.
- ✓ Overheads, which could be directly attributed to the units, are booked in the respective units.

• Property, Plant and Equipment

Property, Plant and Equipments are stated at cost, net of accumulated depreciation/ amortization and impairment losses, if any. The cost comprises the purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working conditions for the intended use. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. This applies mainly to components for machinery. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditure related to an item of property, plant and equipment is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing property, plant and equipment, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the year during which such expenses are incurred. Gains or losses arising from de-recognition of PPE are measured as the difference between the net disposal proceeds and the carrying amount of asset and are recognized in the statement of profit and loss when the asset is derecognized.

• Depreciation on Property, plant and equipment

Leasehold land is amortized on a straight line basis over the period of the lease which is of 30 years.

The company identifies and determines cost of asset significant to the total cost of the asset having useful life that is materially different from that of the remaining life. Depreciation on Property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on useful lives of the assets considering the guidelines of Part C of Schedule II to the Companies Act, 2013.

Asset Category	Useful Life (in years)
Furniture & Fitting	10 Years
Vehicles	08 Years
Office Equipments	05 Years
Computers	03 Years
Trucks	06 Years

• **#Inventories**

Stock of Spare Parts, Tyre and Oil is valued at Lower of cost or Net realizable value. Cost comprises of purchase prices, expenses incurred to bring inventory to its present location and related taxes net of tax credit, if any, available. Cost is determined on a first-in-first-out method.

Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale

• **Retirement and other Employees' Benefits**

Employer's Contribution to the P.F. / E.S.I. are made at a pre determined rate and charged to profit and loss account. The company operates a defined benefit plan for its employees, viz., gratuity. The cost of providing benefits under this plan is determined on the basis of actuarial valuation at each year-end using the projected unit credit method. Actuarial gains and losses for the said defined benefit plan are recognized in full in the period in which they occur in the statement of profit and loss.

• **Contingencies and Provisions**

A provision is recognized when there is a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current management estimates.

• **Borrowing Cost**

Borrowing cost that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as a part of the cost of that asset subject to the provisions of impairment of the assets and other borrowing cost are recognized as an expenses in the period in which they are incurred.

• **Investments**

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. If an investment is fully acquired or partly acquired, by issue of shares or other securities, the acquisition cost is the fair value of the securities issued.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

• **Segment Reporting**

The Company has identified Transportation business segments (industry practice) as its primary segment and warehousing business segments as its secondary segment. As the Company's business activity falls primarily within a single primary business segment and a single geographical segment (within India), the disclosure requirements of Accounting Standard 17 - 'Segment Reporting' in this regard are not applicable.

• **Accounting for Taxation and Deferred Tax**

Tax expense comprises of current and deferred taxes. Provision for current tax is made on the assessable income at the tax rate applicable to the relevant assessment year in accordance with the Income Tax Act, 1961 enacted in India and tax laws prevailing in the respective jurisdictions where the Company operates.

Deferred Income Taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and deferred tax liabilities are offset, if a legal enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to same taxable entity and the same taxation authority.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax.

The company recognises MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period, i.e, the

period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes Mat credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income Tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement."

• ##### Earning per share

The basic earning per equity share is computed by dividing the net profit or loss for the year attributable to the equity shareholders by the weighted average number of equity shares outstanding at the end of the year. The weighted average number of equity shares outstanding during the year is adjusted for events of bonus issue, that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earning per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares

• Impairment

In accordance with Accounting Standard 28 on 'Impairment of assets', the carrying amount of the Company's assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amount is estimated. The recoverable amount of the assets (or where applicable that of the cash generating unit to which the asset belongs) is estimated at the higher of its net selling price and its value in use. An impairment loss is recognized whenever the carrying amount of the asset or cash-generating unit exceeds its recoverable amount.

Impairment losses, including impairment on inventories, are recognized in the statement of profit and loss.

After Impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

• Leases

Where the company is lessee

Finance leases, which effectively transfer to the company substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease term at the lower of the fair value of the leased property or present value of minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining

balance of the liability. Finance charges are recognized as finance cost in the statement of profit and loss. Lease management fees, legal charges and other initial direct cost of lease are capitalized.

A leased asset is depreciated on a straight-line basis over the useful life of the asset. However, if there is no reasonable certainty that the company will obtain the ownership by the end of the lease term, the capitalized asset is depreciated on a straight-line basis over the shorter of the estimated useful life of the asset or the lease term.

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the statement of profit and loss on a straight-line basis over the lease term.

Where the company is the lessor

Leases in which the company transfers substantially all the risks and benefits of ownership of the asset are classified as finance leases. Assets given under finance lease are recognized as a receivable at an amount equal to the net investment in the lease. After initial recognition, the company apportions lease rentals between the principal repayment and interest income so as to achieve a constant periodic rate of return on the net investment outstanding in respect of the finance lease. The interest income is recognized in the statement of profit and loss. Initial direct costs such as legal costs, brokerage costs, etc. are recognized immediately in the statement of profit and loss.

Leases in which the company does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Assets subject to operating lease are included in fixed assets. Lease income on an operating lease is recognized in the statement of profit and loss on a straight line basis over the lease term. Costs, including depreciation are recognized as an expense in the statement of profit and loss. Initial direct costs such as lease costs, brokerage costs, etc. are recognized immediately in the statement of profit and loss.

Cash and Cash Equivalents

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank and in hand and short-term investments with an original maturity of three months or less.
